SUBJECT			
Pasco Sanitary Landfill			
SUMMARY OF COMMUNICATION			
<p>On February 19, John Zillich called to inquire about the status of EPA work at the Pasco Sanitary Landfill. I indicated that we are planning a sampling investigation for the second or third week in March. He asked that we provide a copy of the sampling plan prior to our field work; I will take care of that as soon as we receive and review E&amp;E's draft. Other items to note:</p> <p>There are dedicated pumps in the 3 wells at the landfill where organics were previously detected.</p> <p>He will have a pump available to sample the other wells and prefers EPA use the pump rather than bailer. What is our decision on this?</p> <p>He would like to split samples of any downgradient drinking water wells.</p>			
CONCLUSIONS, ACTION TAKEN OR REQUIRED			
<p>I told him we would try to coordinate our field efforts with him--so please call him prior to final scheduling of the field work to arrange for this.</p>
